Software Design Engineer - Step 1 / 2

We respect your time! Short answers will work just fine. These questions may sound naive but will help us pre-select the right candidates!

Multithreading

Have you written multithreaded code? Please provide some context as well as the coding primitives you used.

Debugging

What is the hardest problem you've had to debug? Please explain which tools / techniques you used and what you uncovered.

Optimization

Is there any type of code or problems you like to optimize? What is your favorite optimization technique?

Algorithm

Is there any interesting algorithm you've implemented for a real-world project? What does it do?
